## **Important terms:**

**Fauna:** Humanoid creatures with varying animal aspects.

**Purebred:** Fauna with single "Breed". Most of the Purebred consider themselves true fauna and established the empire thousands of years ago after three wars with the Chimera, which ultimately saw the Chimera oppressed and enslaved.

**Chimera:** Fauna with more than one "Breed". The Empire considers them to be less than animals and uses them as slaves.

**Mating:** Marriage

**Marked:** Betrothed

**Opalite/Opalesque:** Broad spectrum term which refers to any fauna who does not conform to cisgender heterosexuality. Most Opalites are honored and considered beneficial by adopting orphaned or abandoned children. While it's not illegal for Opalites to mate with fauna of different breeds, such couplings are still frowned upon. There are four general classifications for Opalites which indicate partner type/number:

-Mono'Opalite - Attracted to one gender.

-Omni'Opalite - Attracted to more than one gender.

-Poly'Opalite - Has/desires multiple romantic partners.

-Indo'Opalite - Equivalent to Ace or Asexual.

Some Opalites may define their aspect further by adding a suffix at the end such as Fem, Masc, or Andro. (Example: Omni'Opalite-Andro for Nonbinary Bisexual)

**Drakche:** God of Death, ushers souls across the veil when they pass.

**Kirin:** Goddess of Life, brings souls from the veil for rebirth.

**Falhara:** Goddess of Chimera and daughter of Drakche and Kirin, who was injured and had her memories stolen.

**Entos:** Humanoid creatures with varying insect aspects.

**Primerian Order:** Rebel faction who intends to overthrow the empire and free Chimera from slavery.

**Otherwhere**: Realm where a fauna gathers magic to cast. Each fauna only has an absolute finite amount.

**Dream Trance**: Name for the meditation used to send the mind to their Otherwhere.

**Everstorm**: Giant endless storm which constantly churns in the ocean between Cathania and the Heartland.

**Everstorm Prison**: An island on the edge of the Everstorm where imperial criminals are sent.

**The Purge**: An event which occurred in the year 3263 where Emperor Estrotho, then 19 years old, led a three-year campaign across Olultan to eradicate all hidden villages. He was the first of the Lion Emperors to initiate such a large-scale attack against the Chimera. Shuloch would meet the same fate four years after the purge ended.

**Beist**: Common mount. Tend to be large (between the size of a Percheron and a Shire) and strong, with cloven hooves. Males have long horns (sometimes spiraled, curly, or straight.) coming from behind their ears and a beard. Their tails are long and thin with a tuft of hair on the end.
